

DASH

What is cryptocurrency?

Cryptocurrency is a digital asset that uses cryptography to secure the transactions and to control the creation of additional units of the currency. The value of the currency is not tied to any country or to any central bank.

The price is determined by demand and supply.

When will cryptocurrencies replace money?

Today cryptocurrency is already performing the money functions and the question is when cash and non-cash types of money will exhaust its possibilities in comparison with the advantages of cryptocurrency.

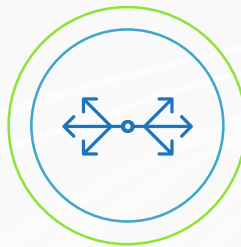

Bitcoin, the first cryptocurrency, appeared in 2009.

The advantages of cryptocurrencies:

**SAFETY,
RELIABILITY**

**DECENTRALIZATION
AND SECURITY**

**ANYWHERE IN
THE WORLD**

**ANY TIME OF
THE DAY**

**ZERO OR
LOW FEE**

**INSTANT
TRANSFERS**

What is DASH and what are its advantages?

DASH -

is the next generation of cryptocurrencies

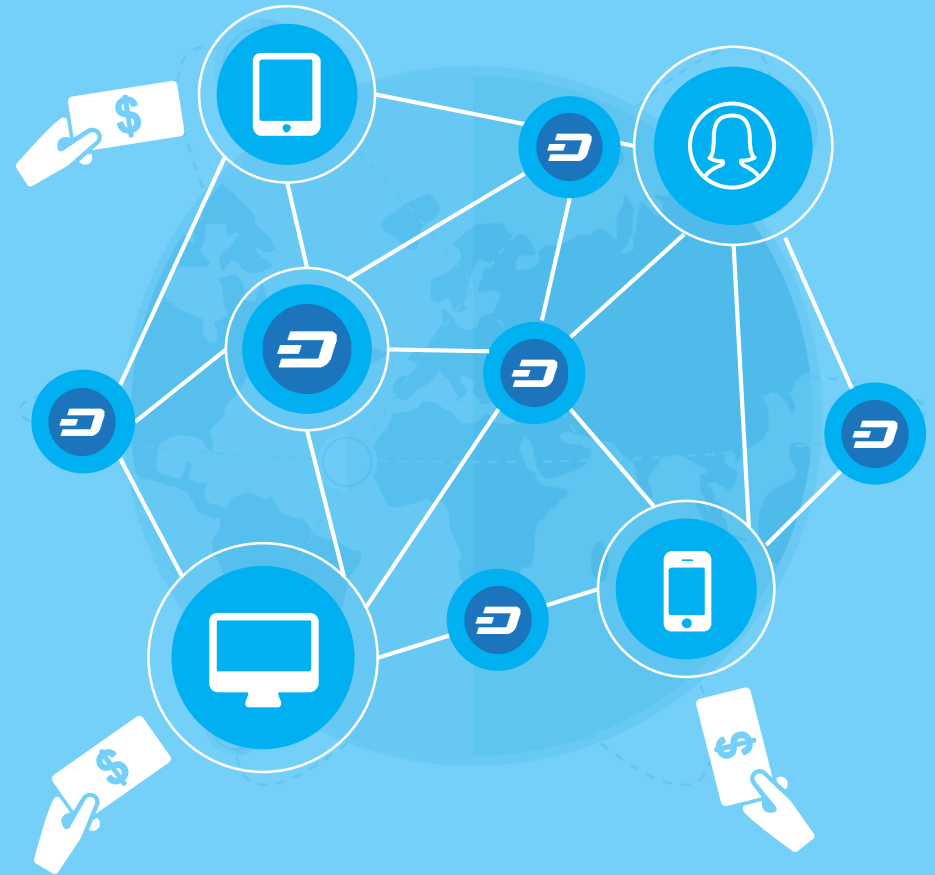

Dash has eliminated the disadvantages of Bitcoin and is the first electronic currency operating as cash.

Why does Dash have value?

Dash has no governing center, Dash further movement depends on a vote of its members, and it is completely decentralized. This is one of the main differences between Dash cryptocurrency and pyramid investment schemes, where everything is concentrated in the same hands.

The cryptocurrencies price is like the precious metals price, instead of changing the volume of the issue in order to keep prices at the same level, the amount is set in advance, and the price varies freely.

The advantages of DASH

InstantSend

Thanks to the InstantSend technology payments are received almost instantly

MASTERNODE NET

Masternodes support the blockchain synchronizing, ensure the network safety and its enhanced functionality.

Masternode Holders are encouraged at a rate of 8% per annum.

DASH - Evolution

Evolution is a project which aims to make DASH more accessible and easier, so "even your grandmother" could understand it. The project is scheduled for the beginning of 2018.

privatesend 

Privatesend allows to send anonymous payments.

Is this legal?

All countries can be divided into three blocks:

Those who support cryptocurrencies, those who ban them and those who do not regulate cryptocurrencies.

USA

The US Treasury Department has classified Bitcoin* a decentralized virtual currency.

European Union

The European court decided to consider bitcoins as a means of payment and exempted from the consumption tax.

Russia

The legislation of the Russian Federation has no direct ban for Russian citizens to use cryptocurrency in transactions.

© the Letter N OA-18-17/1027 , FTA..

China

Using of cryptocurrency is only allowed for individuals, it is regarded as a commodity.

Brazil

Using of cryptocurrency is not regulated by the state.

India

Using of cryptocurrency is not regulated by the state.

Japan

It is a legal means of payment.

* At the moment, the attitude towards Bitcoin means the attitude towards all cryptocurrencies.

Is it safe?

Wallet.dat file is the base of the classic wallet.
It stores all transactions and cash balance.
The file is stored in a protected user directory.

For more security you can use a password on the domestic wallet, without which it will not be able to transfer money.

Make backups of the file wallet.dat and you will be able to restore your wallet on another computer.

And where and how to buy / sell Dash?

01

Dash can be bought and sold on cryptocurrency exchanges.

02

There are services with the launch of debit cards, such as Bitwala, SpectroCoin, Shake.

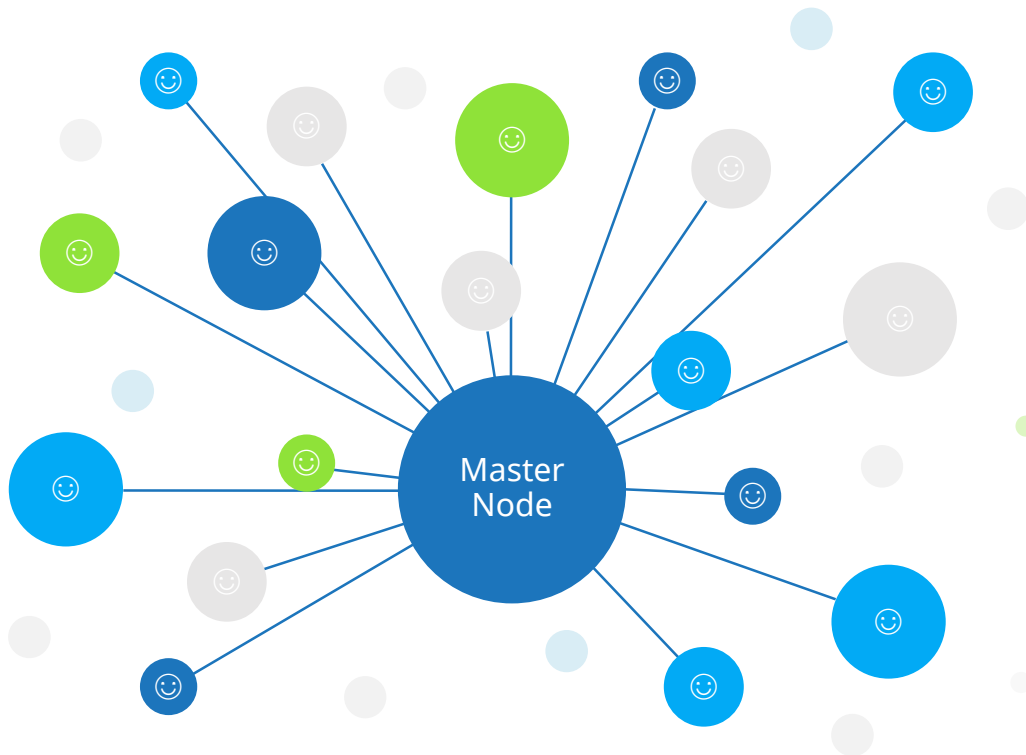

03

You can use Dash to pay [in the following stores](#).

What can I use it to pay?

How can I earn money using it?

Masternode owners can vote for or against the changes and influence the way DASH develops.

Masternode payments

Each holder of 1,000 DASH can run masternode that will get him 8% per annum.

~8%

Due to the growth rate of the DASH

The cost of the DASH for 2016 increased from 2\$ to 11\$

Selling goods and services for DASH

You can always use DASH as a mean of payment in your e-commerce site
