

THE
FUTURE
IS
HERE

Dash
Digital Cash

Dash is Digital Cash that can be used globally.

What is cash and how can cash be digital? The most important characteristics of cash are its speed, low transaction costs and the anonymity of the payment process.

Dash is the first cryptocurrency in the world that has successfully combined all three characteristics.

Dash InstantSend allows global transactions in 1.3 seconds.

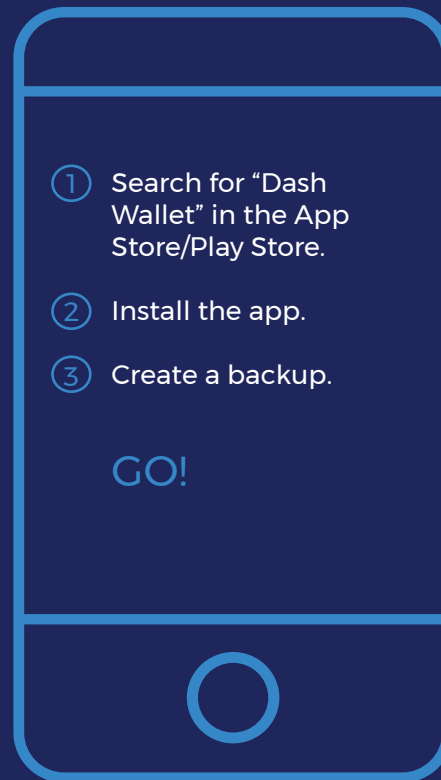

Dash PrivateSend protects your privacy.

The Dash blockchain is stored on decentralized servers and is more secure than a centralized database.

INSTANT, PRIVATE & SECURE

3 steps to setup your own wallet.

To be able to pay with your Dash Wallet you have to fund it first. You can use an exchange or an ATM to do this.

Discover the benefits.

Dash works internationally – all that is required is power and internet. Dash has no need for banks or payment processors thanks to its decentralized organizational structure. You are in full control of your own money. You are your own bank.

Benefits:

Low transaction fees of €0,01 or less

High transaction speed of 1.3 seconds

Easy and free setup via app
